

## DENEB BOLLARD

Designed by Stimulo (Spain)

Versatile and functional, DENEb bollard can be installed on both modern and architectonical landscapes.

A single triangular part with a hole in the middle emits light linearly and directly, while the layout with six parts forms an illuminated circle that adds new patterns to the ground.

Light is ideal for areas where subtle light is needed. Great for a controlled pathway which allows you to see without bright light that may disturb, and helps to reduce the risk of injury.

DENEb's careful design is compact and in direct contact with the LEDs, allowing for greater heat dissipation, which in turn extends the lifetime of the fittings and reduces maintenance costs.
